IRONFEATHER BACK PACK STORAGE OR 3 PERSON EXTENDED CAB/REST CAB

The IronFeather back pack system from NSI fills a market demand for additional cab storage space. Engineered with weight and strength in mind, IronFeather back packs are designed to increase driver and passenger cab comfort, operational flexibility and ease of work.

Presently in use for Western Star models 4700 and 4900, and with other OEM designs in progress, current IronFeather back packs are available in 12" - 36" with 36" offerings also available as cab sleepers and 3 person bench seating with seat belt certification.

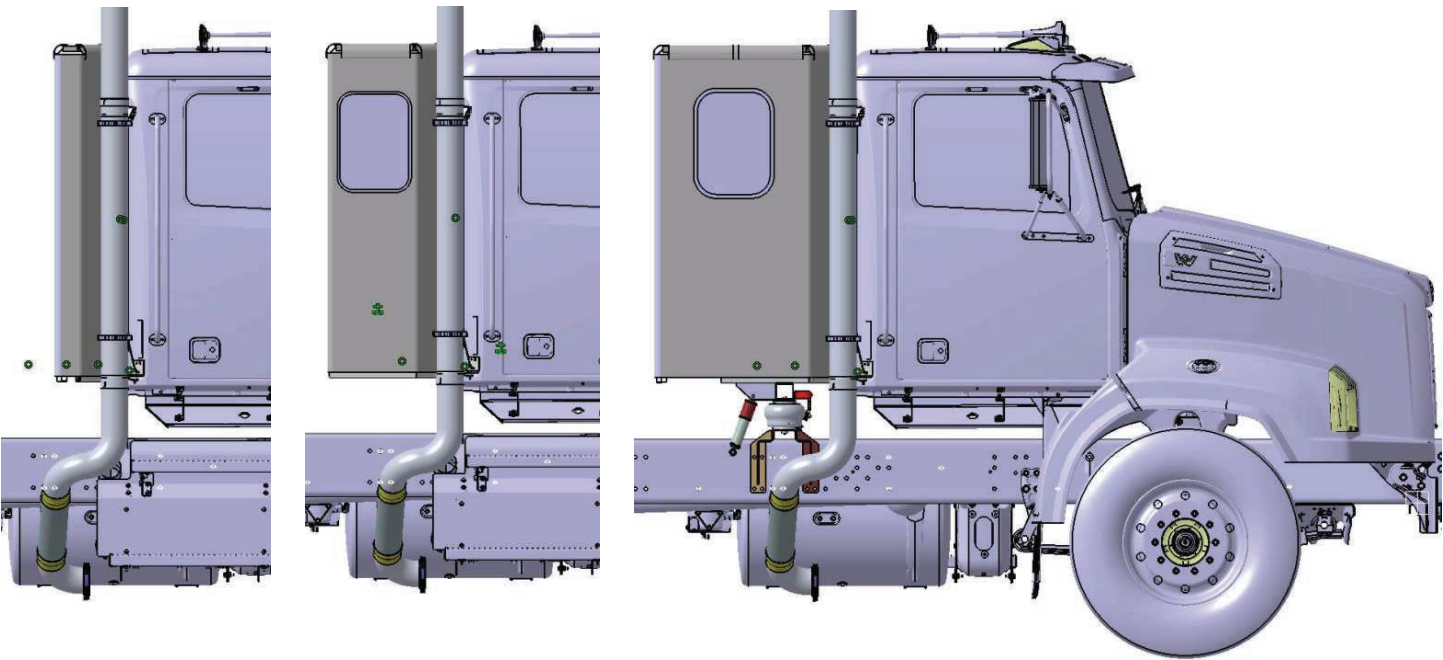

ORDERING

Make, model, serial number and year of manufacture, combined with selected desired options, allow NSI to work with our partners to provide the correct IronFeather product.

Have specific needs and wants? Our team is on hand to support you through the process.

NSI works directly with truck OEM and Dealers to ensure ordering instructions/codes are in place that coordinate with each truck ordering process and OEM production right through to installation.

Refer to separate order forms specific to each truck OEM.
